

OUTFITTERS

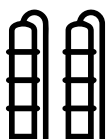

DISTILLED
USA
& BOTTLED

Designed for bartenders.
Made for cocktails.
Distilled from American heartland corn using multiple distillation columns, then gently mixed with cascade mountain water and filtered through activated carbon to give it a smooth, and crisp mouth feel.

INGREDIENTS

MIDWEST CORN

Grown in the USA and high in sugars which convert to alcohol, making it an ideal candidate for both efficient and excellent spirits.

DISTILLATION

COLUMN DISTILLED 5 TIMES

OUTFITTERS vodka is distilled to an extremely high proof over 96% (192 proof), this higher distillation point allows for a smoother, crisper vodka allowing the cocktail ingredients to shine through as intended.

BOTTLING DETAILS

ABV 40%

PROOF 80

1 LITER

12 BOTTLES PER CASE

WATER

CASCADE MOUNTAIN WATER

After distillation, the 192+ proof clean spirit is diluted to 80 proof (40% alcohol) with water from aquifers near Mount Baker, known from the longest snow pack in the lower 48 states. This gives a slight crisp minerality and refreshing profile to Outfitters vodka.

GLUTEN FREE

FILTRATION

ACTIVATED CARBON

Before bottling, OUTFITTERS vodka is gently filtered through activated carbon polishing filters to produce a superior quality vodka. This process removes residual impurities that could be left after distillation.
